

ErgoScience Overview

Custom Solutions...Proven Savings

ErgoScience partners with employers to develop customized solutions that reduce workers compensation claims and to maximize the investment they have made in their employees. From preemployment to post-injury, our industrial consultants can design the program that fits your specific needs.

How We Can Help:

Injury Prevention: ErgoScience can design and implement systems that utilize physical assessment to help prevent costly injuries.

Claims Reduction: Our programs can assist in reducing claims by accurately diagnosing the appropriate level of work.

Employee Turnover: ErgoScience has found that matching the worker to the physical demands of work reduces turnover and increases worker satisfaction levels.

Scope of Services:

- Post-Offer Screening
- Job Demands Analysis
- Ergonomic Assessments
- Return-to-Work/Fitness-for-Duty Screening
- Functional Capacity Evaluations (FCE)
- Worksite Therapy
- Return on Investment

Why ErgoScience?

Research and Clinical Network

What we do is more objective and defensible than the competition. Our testing protocols were developed at the University of Alabama at Birmingham and the research validating them has been published in peer-reviewed occupational medicine journals. We also have one of the industry's largest network of national and international clinics that provide our assessments.

Unleash your company's savings potential!
